

**ALWAYS INSIST ON  
TOYOTA GENUINE PARTS**

All Toyota Genuine Parts carry a 12-month/  
unlimited kilometre Toyota Warranty.  
Each Toyota Genuine Part is designed and  
constructed to the original manufacturer's  
specifications for maximum performance,  
longevity and perfect fit.

Remember, if a non-genuine part is fitted to your  
Toyota and that part's failure damages your vehicle,  
then that damage will not be covered by your  
Toyota Warranty. For example, if a non-genuine

Oil or Coolant fails to perform sufficiently, any  
engine damage caused through excessive heating  
(arising from the non-genuine part) will not be  
covered under your Toyota Warranty. Your Toyota  
Warranty is priceless protection and peace of mind.  
Why would you ever risk it?

**Please note:** Maintenance, service or expendable  
parts such as Motor Oil, are covered for  
manufacturer's defects but are not covered for  
wear as they are a normal maintenance item.

### PREVENT PREMATURE AGEING

Your Toyota knows that lubricants and fluids are its lifeblood. Using the wrong ones can dramatically affect its lifespan and performance. Which is why your Toyota Service Centre stocks a complete range of Toyota Genuine lubricants and fluids specifically designed to suit the needs of your vehicle. Your Toyota wants a long healthy life, and you want that too, so ask your Toyota Service Advisor about the products best suited to your model. You see, your Toyota Service Centre does a lot more than just servicing, and we do it all genuinely better.

### TOYOTA GENUINE MOTOR OILS

Toyota Genuine motor oils have been specifically formulated by Toyota after taking into consideration the diverse driving conditions your Toyota may encounter. Toyota Genuine motor

oils provide engine protection against starting friction, heat stress and engine sludging, which in turn gives you better performance and ensures maximum engine life. In fact, changing your engine's oil and filter regularly is one of the most important procedures you can perform to extend the life and performance of your Toyota.

If you do a lot of stop/start driving, drive in dusty, dirty conditions or do a lot of towing you should change your oil more frequently. And always ensure that your oil filter is changed every time your oil is. For further details refer to the additional service requirements in your Owner's Manual.

### TOYOTA GENUINE 50/50 PREMIXED SUPER LONG LIFE COOLANT

Given its excellent anti-boiling and anti-freezing properties this coolant is well suited for use in all seasons particularly in countries such as Australia where the climate can vary dramatically.

For optimum performance have the coolant replaced at intervals in accordance with your service book or every 80,000kms.

This will ensure that corrosive particles don't get a chance to accumulate thereby keeping your cooling system operating efficiently.

### TOYOTA GENUINE BRAKE FLUID

High performance brake fluid is essential in keeping braking systems in top working condition. Toyota Genuine Brake Fluid provides a higher 'Wet Boiling Point' which simply means that it performs better than other brake fluids under extreme conditions. It also contains additives to prevent corrosion, sludge formation and brake fluid leakage.

### JETSTREAM FUEL INJECTOR CLEANER

Fouled fuel injectors reduce engine power and fuel economy and can make your vehicle difficult

to start. Jetstream rapidly penetrates deposits that build up on fuel injectors and intake valves and breaks them down, thereby allowing them to be dissolved in the fuel and burnt as part of the combustion process. Jetstream should be used at each scheduled service or whenever your vehicle shows a loss of power or you notice an increase in fuel consumption.

### TOYOTA GENUINE ANTI-SMEAR WINDSCREEN WASHER ADDITIVE

On average, your windscreen wiper blades wipe the equivalent of 40 acres of glass each year. Plain cold water in the washer reservoir cannot cope with grease and grime causing you to run your wiper system longer than necessary. That's why Toyota Genuine Windscreen Washer contains a rubber conditioner as well as a cleaning additive. The result is cleaner windows with less strain on the wiper system.
